Babar Azam regains top

ISLAMABAD: The Election Commission of Pakistan (ECP) has commenced the acceptance of nomination papers from potential candidates set to participate in the upcoming general elections scheduled for February 8, 2024. The process allows candidates to collect forms from the electoral body between 8:30 am and 4:30 pm, with the deadline for submission being December 22 (Fri-

In anticipation of the electoral process, the ECP is set to unveil the preliminary list of candidates on December 23. The scrutiny of nomination papers is slated to take place from December 24 to 30, ensuring a thorough evaluation of the submitted documents. To facilitate the nomination process Karachi, where 22 National Assembly seats and 47 provincial assembly seats are up for contention, the ECP has appointed 69 Returning Officers (ROs) and seven District Returning Officers (DROs) for the national and provincial assemblies.

The ECP is also gearing up to allocate election symbols to political parties and independent candidates on January 13, just under a month before the scheduled polling day on February 8. Prospective candidates vying for reserved seats for women and minorities in provincial legislatures and the National Assembly can obtain their nomination papers from their respective ROs and the district election commission at a specified cost. Submission of these papers will be accepted from December 20 to December 22, with all subsequent proceedings, including scrutiny, conducted at the respective

ISLAMABAD: In a development that has reverberated across the public sphere, the National Electric Power Regulatory Authority (NEPRA) has granted approval for a substantial increase of Rs 1.15 per unit in electricity rates for distribution companies (DISCOs).

The approval, part of the quarterly adjustment mechanism, comes with a hefty financial implication, imposing an additional bur-den of Rs 22.29 billion on consumers. NEPRA'S notification, signaling the impending price hike, has been forwarded to the government for final approval, with the new rates expected to take effect from January 1, 2024. Once approved, consumers, including those served by K-Electric, will bear the impact of the increased electricity prices.

Indian PM Modi vows probe into alleged US murder plot

News Desk

NEW DEHLI: In response to the alleged links between India and a US-based assassination plot, Prime Minister Narendra Modi broke his silence, stating that India would "definitely look into" any evidence provided on the matter. The remarks come after the US charged an Indian man in November with conspiring to murder Gurpatwant Singh Pannun, a vocal supporter of the Khalistan movement, in New York.

Speaking to the Financial Times, Prime Minister Modi dedication emphasized that the allegations would not impact the strong ties between India and the US. authorities, respectively. In 2022, Meta Platforms, the parent company of Facebook and Instagram, detected and reported 26 million images, emphasizing the ongoing challenge in combating child sexual abuse material (CSAM) online. Popular apps among teenagers, Snapchat and TikTok, also contributed to reporting efforts, filing over 550,000 and nearly 290,000 reports to the US National Center for Missing and Exploited Children.

The European Commission, in December, directed Meta to explain its actions to combat the spread of illegal sexual images taken by minors through Instagram under the EU's new content-moderation rulebook, the Digital Services Act (DSA). Law enforcement agencies worldwide are grappling with the increasing challenge of identifying and apprehending individuals involved in child exploitation, particularly as offenders become more adept at concealing their digital tracks. The use of encrypted communication online has further complicated investigations, creating a pressing need for enhanced tools and leg-

Europol established a database in 2016, housing 85 million unique photos and videos publicly searchable and requires special software to browse. Despite the difficulties in this challenging realm, international efforts persist to combat child sexual exploitation online and

IPP President Aleem Khan gets nomination papers from 3 seats of Lahore

News Desk

LAHORE: President of the Istehkam-e-Pakistan Party (IPP) Abdul Aleem Khan will contest elections from a national assembly seat and two provincial assembly constituencies of Lahore. On Wednesday, Aleem Khan obtained nomination papers from NA 119 and PP-149 from Lahore. The media reported that Abdul Aleem Khan could also be a candi-PP-150 of the Punjab Assembly.

Nomination papers have been received for all three constituencies and likely nomination papers would be submitted on Thursday (to-Istehkam-emorrow). Pakistan Party (IPP) Ja-Khan Tareen's daughter Meher Khan Tareen will also announce to participate in elections and receive nomination papers for NA-155 Lodhran and PP-227. Meher Khan Tareen's nomination papers were received by Jahangir Tareen's legal team. Meher Khan Tareen will be covering candidate of the Jahangir Khan Tareen. Jahangir Tareen's final decision to contest the election from NA-155.

IHC fixes Imran's plea against in-camera trial in ciphergate By our correspondent

ISLAMABAD: The Islamabad High Court has scheduled a hearing for Thursday to address Pakistan Tehreek-e-Insaf (PTI) founder Imran Khan's petition challenging the orders for an in-camera trial in the cipher case against him. The special court, established under the Official Secrets Act 2023, had approved the Federal Investigation Agency's plea for an in-camera hearing on December 14. Imran Khan has contested this decision, seeking to nullify the orders and prevent further proceedings until a decision on his petition is made.

Imran Khan, the former Prime Minister, argues that an open trial in the presence of the media and the public is crucial to fulfilling the requirements of justice. The special court, headed by Judge Abul Hasnat Zulqarnain, announced the reserved verdict on December 14, imposing restrictions on reporting the proceedings and allowing family members access to the courtroom during the hearing. In addition to challenging the in-camera trial orders, Imran Khan has submitted a separate plea challenging the trial court proceedings. The former PTI chairman and Vice-Chairman Shah Mahmood Qureshi have been indicted for the second time on December 13 on charges related to the alleged misuse of diplomatic cables for political purposes.

The cipher case, known as Ciphergate, involves a controversy that emerged on March 27, 2022, when Imran Khan claimed a foreign nation conspired against his government. He accused the United States of interference and claimed a cipher revealed a plot against him. The case involves audio leaks, discussions on the cipher, and accusations against political rivals. The federal cabinet approved the holding of a jail trial, leading to the second indictment of Imran Khan and Shah Mahmood Qureshi. The IHC hearing, scheduled for Thursday and presided over by Jus-tice Miangul Hassan Aurangzeb, will address Imran Khan's plea against the incamera trial and subsequent proceedings in the cipher

'Fatwa' against TikTok, navigating moral conundrums in the digital age

n the labyrinthine landscape of religious edicts and technological evolution, the recent fatwa pronounced by scholars at Jamia Binoria Town in Karachi, categorizing the ubiquitous video-sharing platform TikTok as "Haram," has ignited a fresh dialogue on the ethical ramifications of modern digital indulgence.

The meticulously articulated fatwa, a testament to the intersection of religious tenets and contemporary technology, resonates with resolute denunciation. It reverberates not merely as a condemnation of an application but as a somber echo of societal anxieties surrounding the ethical compass of technological advancements.

At its core, the fatwa asserts that TikTok, a platform boasting over 39 million downloads in 2022 alone, is now draped in the cloak of "Haram," a term encapsulating the scripturally forbidden. The religious decree contends that TikTok has metamorphosed into a digital haven for activities explicitly outlawed by religious doctrine. These activities span a spectrum from the sharing of proscribed imagery, videos, and music to the dissemination of indecent content, all facilitated by a backdrop of financial pursuits. The stark condemnation emanating from the religious scholars encapsulates the pervasive concern that TikTok, despite its veneer of innocuous entertainment, is inextricably tethered to the unsavory underbelly of immoral content proliferation. The fatwa's contention that TikTok serves as a conduit for the commodification of impropriety raises pertinent questions about the ethical contours of financial pursuits within the digital realm.

Beyond the intricacies of religious jurisprudence, the fatwa casts a discerning eye on the diverse demographic spectrum navigating the TikTok landscape. The assertion that individuals spanning generations, from the youth to the elderly, partake in content creation that may not align with robust moral principles elucidates the far-reaching impact of digital platforms on societal values.

TikTok's trajectory in Pakistan, marked by recurrent calls for bans and regulatory interventions, underscores the dichotomy between its widespread popularity and the escalating concerns regarding its content dynamics. The echoes of discontent that resonated earlier this year in the corridors of the Lahore High Court, coupled with the temporal ban imposed by the Pakistan Telecommunication Authority in 2021, have now found a reverberating chorus in the pronouncement of the recent fatwa.

In navigating the delicate nexus of religious doctrine and digital indulgence, it is imperative to dissect the motivations behind such fatwas and their implications on societal conduct. The edict, while rooted in the lens of moral rectitude, opens a dialogue that transcends theological boundaries, prompting reflection on the symbiosis between technology and ethics in our ever-evolving digital

Pioneering Blockchain in Pakistan's legal nexus

n the annals of technological innovation, the advent of blockchain technology emerges as a potent force with transformative implications for Pakistan's legal echelons. Recognized for its decentralized ledger capabilities, blockchain stands poised to unfurl a new chapter in legal processes, ushering in a paradigm shift characterized by transparency, efficiency, and augmented access to jus-

The adoption of blockchain technology presents an opportune moment to comprehensively address the multifaceted challenges inherent in Pakistan's legal landscape - a landscape grappling with issues of trust deficit, legal delays, and labyrinthine property disputes. At its core, blockchain's intrinsic transparency serves as a bulwark against fraud and unauthorized alterations, thereby fortifying the integrity of legal proceedings and instilling renewed trust in the country's legal apparatus.

Internationally, pioneers such as Estonia, the UAE Singapore, Sweden, China, the US, Australia, and Switzerland have boldly embraced blockchain, etching significant advancements in their legal frameworks. For Pakistan, this adoption stands poised as a watershed moment in the quest to overcome challenges in case management, property disputes, and the secure registration of land titles.

Efficiency in case management emerges as a linchpin wherein blockchain can effect transformative change The tamper-proof nature of case files and the transparent tracking of case progress on a blockchain can orchestrate a harmonious symphony within judicial processes, potentially mitigating the specter of case backlog and administrative delays. In a country where secure property rights are synonymous with economic development, blockchain's role in elevating land title management is indispensable.

Moreover, blockchain's promise extends to facilitating international trade and cross-border transactions, promising a more seamless and secure cross-border legal milieu. Identity verification, a perennial concern, finds an ally in blockchain, providing a robust and verifiable means of authenticating individuals.

Enter smart contracts - the vanguard of legal agreements in the digital age. These self-executing contracts, with terms directly inscribed into code, herald a transformative juncture in legal processes. The automation and streamlining of legal procedures through smart contracts align with global trends in legal technology, promising efficiency gains. Yet, the embrace of blockchain in legal processes is not devoid of challenges, chief among them being regulatory considerations. A judicious and comprehensive regulatory framework, adept at addressing data privacy concerns, stands as a sine qua non for the ethical and responsible integration of blockchain technology. Public awareness and education are indispensable companions on this transformative journey, with collaboration with legal tech startups poised to expedite blockchain

The potential dividends of embedding blockchain within Pakistan's legal processes, from heightened transparency and efficiency to the resolution of property disputes and facilitation of international trade, beckon a future where the legal framework is more accessible, transparent, and efficient. Surmounting challenges necessitates a concerted effort - regulatory clarity, educational initiatives, infrastructure development, and stakeholder collaboration.

To propel Pakistan into the vanguard of successful blockchain integration, the government must ardently prioritize the development of a lucid regulatory framework, invest in educational initiatives, and address infrastructure challenges head-on. The encouragement of collaboration between the public and private sectors, the initiation of pilot projects, and the elevation of public awareness stand as pivotal steps toward fostering trust and realizing the transformative potential of blockchain technology within Pakistan's legal landscape.

ndia's startup ecosystem exposes the harsh reality of the vast wealth gap between founders and their employees, revealing the dark side of entrepredreams. "Your founder just bought a 12-crore villa." I read in newspapers. "I can only imagine the work culture and perks you must be used to," said a laid-off startup employee, recounting a recent job interview. She expressed frustration, "They've slashed our salaries by 30-40%, creating a smokescreen. And with the founders flaunting lavish ifestyles on social media, battling this perception is tough."

During the startup boom, headines buzzed with stories of startups giving luxuries like Mercedes cars, high-end work-from-home setups. generous ESOPs, and liberal leave reality checks on business models and product-market fits set in, a tightening of belts is expected. However, my conversations with over a dozen startup executives and employees reveal a painful disillusionment. They are aware of the challenging business conditions, but the lavish lifestyles of some founders expose a tragic contradiction. In one world, startup founders live like royalty, showcasing their wealth and success. In another, their employees struggle with tight budgets and job uncertainty, their careers overshadowed by sudden job cuts and late pay or no pay. **Echoes of Whitefield**

In Bengaluru, the Adarsh Palm Retreat (APR) stands as a symbol

Sanam Javed Throws Down the Gauntlet, Set to Challenge Maryam Nawaz in Elections

LAHORE: Sanam Javed, an ardent supporter of the Pakistan Tehreek-e-Insaf (PTI), has boldly declared her candidacy in the upcoming general elections, aiming to go head-to-head against the formidable Pakistan Muslim League-Nawaz (PML-N) leader, Maryam Nawaz.

Javed Iqbal, the proud fa-ther of Sanam Javed, revealed this audacious decision during a media interaction at the Lahore High Court on Tuesday. He confidently stated that Sanam had resolved to contest the upcoming general elections, targeting the very constituency where Maryam Nawaz plans

to make her stand. "Sanam is gearing up to submit her documents to the Election Commission of Pakistan for the Member of Provincial Assembly's (MPA) seat from PP-150 constituency," declared Javed promote a process to free our hostages," the premier that all pertinent documents were being meticulously collected for submission to the ECP, emphasizing the seriousness of Sanam's political

Karachi Central Jail inmates find redemption through creativity

By our correspondent

KARACHI: Inside the confines of the Central Jail in Karachi, incarcerated individuals, including murderers and kidnappers, are finding a unique path to rehabilitation and self-discovery through art creation. Murals depicting rural Pakistani life adorn the prison's walls, each stroke and hue portraying the creativity and skill of the inmates who remain confined within its colonial-era structure.

The rehabilitation art and music program, initiated in 2007, allows prisoners to learn various crafts, including arts and crafts, providing them with a sense of purpose and an opportunity to hone local arts council. The art created by these prisoners is not merely a pastime but a means to earn significant sums, with some artworks fetching thousands
